Version 2.1.0

October, 04th 2020

Version 2

Version 2.1.0 (04.10.2020)

UTF16 Support Added

Strings coded in UTF16 (Unicode) may be processed now.

Version 2.0.0 (27.09.2020)

File Import

Source content may be imported from any file. Files may be imported as string or as byte sequence. On import as string the string format is detected automatically (BASE64, ISO-8859-15 or UTF8).

Version 1

Build 1.2.0 (19.09.2020)

New Format *Decimal Bytes*

The new Format DEC-BYTES has been added as source and destination format.

Build 1.0.0 (02.06.2017)

First version released

The first version of *Waimea Encoder* has been released.
